How to make

Industry Exclusive Concentrated Penetrant NEO-GLO FWB3C

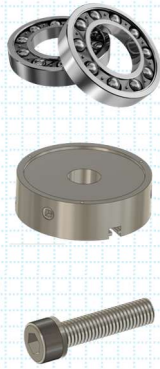

Versatile Applications

Conventional

Penetrant

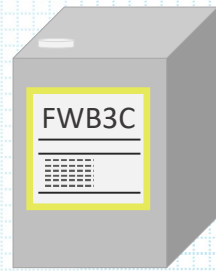

Test piece

Need to select the appropriate penetrant for each test piece, type and crack size.

FWB3C

Penetrant

Test piece

No need to try various penetrants – simply adjust concentrations with our concentrated liquid, FWB3C, to accommodate various surface finishes, defect types, and sizes.

By adjusting the concentration, it is an alternative to oil-based penetrant.

Excellent Surface wetting

Can be inspected with less water usage. Waster water is **30% reduce** compared to conventional product.

Easy Wastewater Treatment

50% Less Chemical Usage Compared to our conventional product.
*From results at 21% solvent concentration

Cost Reduction

Reduces running costs and cargo volume, **leading to cost savings.**
